<b>LEARNING ACTIVITY METHOD</b>	<p>Children's competitions, such as a children's Olympics, are particularly diverse and varied. Lots of small games are played one after the other and result in several competitions for children. Some of the games the teacher can include in this kind of competitions are the following:</p> <p><b><u>Wheelbarrow:</u></b> Two children are a team. One child stands in the back and grabs the legs of the child in front. This is supported with the hands on the floor. They move as a wheelbarrow. The challenge is not to lift their legs too high and not to push too hard from behind.</p> <p><b><u>Three-legged walk:</u></b> In the three-legged walk, two children form a team. Before the run begins, the right leg of one and the left of the other are tied together. As a three-legged team, they must try to cross the finish line as quickly as possible without falling.</p> <p><b><u>Obstacle race:</u></b> The obstacle race is carried out as a relay. The children must cross various obstacles to get to a chair at the end, on which they must sit down briefly and then walk back down the course. Obstacles can be an open cardboard box that the children must crawl through, an upturned beverage crate to climb over, a taut clothesline that they must jump over and a folding rule to balance. The team where all players finish first wins.</p> <p><b><u>Sack race:</u></b> Two children compete against each other. They are in a sack, sleeping bag or coffee bag. They must hop along a marked route. If they fall, they must go back to the start line and start again. This game requires a lot of skill and perseverance.</p> <p><b><u>Animal Experts:</u></b> All children stand in a line about ten paces from the game master. The game master names a letter to the children. The child who first names an animal with this letter can move one step forward. Whoever can name the most correct animals wins the game.</p> <p><b><u>Rubber boot throwing:</u></b> In this group game, each child stands at the starting line and tries to throw the rubber boot as far as possible. There is a tape measure on the side-line to measure the width. Whoever throws the furthest wins.</p>
